DualCom[®]

SIGNALLING CHANGES

Press Release November 2009

DUALCOM TRAINING DIRECT TO YOUR MOBILE

We are pleased to announce the arrival of the DualCom Installation Training Video. We have put together 12 individual sections that have been tailored to provide Installers with a step-by-step guide on how to install The UK's favourite dual signalling, the DualCom GradeShift[®] range.

For ease of reference you can conveniently view the section of interest and have the answer in minutes. These are all available to download from our website and we even have versions for your mobile phone so you can view them whilst on site!

The DualCom GradeShift[®] range incorporates DualCom's unique GradeShift[®] technology providing installers with a dual path single hardware solution for every grade of risk, G2, G3, G4 or Fire. It is priced according to the grade of system required by the installer so that they only pay for the grade they need. The grading of the DualCom can be increased or decreased remotely at any time with a simple call from Installer to ARC, there is no need to change the hardware.

View the brand new DualCom Installation Video now: www.csldual.com/training
